Re: U.S. Patent Application for
TELECOMMUNICATIONS TRANSMISSION TEST SET
Our File No.: 16845-3

Dear Mr. Eidelman:

Enclosed is a draft copy of the above-identified patent application. Please forward the application to Mr. Paul Chang and Mr. Tom Dang for their review.

When reviewing the application, it should be kept in mind that under the patent laws, the application must describe the invention in enough detail to enable "one of ordinary skill in the art" to make and use the invention. In addition, the application must disclose what is considered the best (preferred) mode for carrying out the invention. A "Guide to Review of Your Application" is enclosed to provide some guidance.

Please note the various questions (in bold) embedded throughout the patent application. We would appreciate if answers or comments can be supplied for these questions. Also, regarding Figure 3, it would be helpful to include a more detailed description of the DMM test circuit (322), the TDR test circuit (324), and the line impairment test circuit (326).

After the review, please send us any comments, suggestions or changes deemed necessary or appropriate. We will make the necessary changes to the application and will send a final version to you for review and signature.

We understand that Mr. Chang and Mr. Dang are the joint inventors of this invention. For a discussion of who should be listed as an inventor, please see the attached information sheet entitled "Who is an Inventor?" This should provide some guidelines for determining if our understanding as to the inventorship is correct.
